

Dermatologic History

1. What is the main complaint?
2. At what age did your pet's skin/ear problem begin?
3. Was the onset sudden or gradual?
4. Where on the body did the skin problem begin?
5. What did the skin problem look like initially and how has it progressed?
6. Does your pet show signs of licking, scratching or chewing? Where?
7. What areas of your pet's skin tend to be the most effected currently?
8. Is the skin/ear problem year-round or seasonal?
9. Has your pet always lived in the same area?
10. Have you traveled outside the state/country within the past year? If so, where?
11. What food does your pet eat? Does your pet get treats, rawhides or table food?
12. What heartworm/flea prevention is your pet on? How often given/applied?
13. What treatments have been used and how effective were they?
14. Is your pet receiving any medications currently?
15. Does your pet have any known drug allergies/reactions?
16. Is your pet primarily indoors/outdoors or both?
17. Does your pet have exposure to other animals?
18. Do any other animals or people in contact with your pet have any skin lesions?
19. What diagnostic tests have been performed and what were the results?
20. Is there anything that makes the condition better or worse?
